EDUCATION

Carleton University

Sep 2022 - Apr 2027

Ottawa, ON, Canada

- Bachelor of Engineering, Software Engineering, 4th Year, Co-op
- **Scholarship:** Award of Excellence for International Students, Entrance Scholarship, Henry Ford Scholarship (**\$15,000**)
- **Coursework:** Machine Learning, Data Structures & Algorithms, Object-Oriented Programming, Design Patterns

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Co-op

May 2026 – Aug 2026

Shopify

Ottawa, ON

- Contributed on [Sidekick](#), Shopify's AI commerce assistant, on the App-Gen platform team supporting AI app generation using Ruby on Rails backend and a reactive frontend powered by TypeScript, React, and Preact Signals.
- Built a non-intrusive screenshot tool that captures and rasterizes Shopify web routes in offscreen sandboxed containers to generate cropped or full webp images of users' apps, to provide [Sidekick](#) a visual understanding of app layouts.
- Developed a UI Judge evaluation critic to score and assess AI-generated apps, against human-annotated benchmarks, to give live feedback and improve App-Gen agent performance in real time.

Software Engineer Intern, Co-op

Sep 2025 – Dec 2025

Magnet Forensics

Ottawa, ON

- Developed token-based role-based access control for M1 Hub Storage, building fail-safe UI logic in React and TypeScript to handle network delays securely.
- Implemented a C#/.NET logging utility for the Desktop Storage Uploader to compress and export JSON application logs, validating edge cases via Vitest and MSW.
- Worked in a cross-functional Agile team of software developers, UI/UX designers, and product managers to refine Jira tickets, participate in code reviews, and discuss upcoming technologies and architectural improvements.

Software Engineer Intern, Co-op

Apr 2025 – Aug 2025

Keel Minds

Toronto, ON

- Migrated legacy Flutter UI to newer, modular, and reusable widgets from design, on a patient application serving 111,000+ users, providing web accessibility support and improving testability.
- Contributed to backend routes in Node.js and wrote SQL queries to manage records of care provider/client sessions.

Software Developer Intern

Feb 2025 – Apr 2025

Wouessi Digital

Toronto, ON

- Integrated authentication and PostgreSQL storage into a corporate portal web application using React, TypeScript, and Vue.js.
- Developed a Tender Discovery platform using MongoDB and AWS S3/Lambda, packaging the microservices into Docker containers with integrated CI/CD.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS3, Swift, Ruby, Dart, C#, C/C++, TypeScript, PHP, SQL

Framework: Flutter, TensorFlow, PyTorch, .NET, Ruby on Rails, Node.js, React.js, Express.js, Flask

Tools: AWS, GCP, Git, PostgreSQL, MongoDB, Docker, CI/CD Pipelines, Microsoft Azure, Supabase

Others: LLM, Jira, Agile - Scrum, Unit Testing, Functional Programming, Relational Database

PROJECTS

Founder, Lead Software Developer [App Store](#) [Google Play](#)

Nov 2024 – Present

[Ping](#)

Ottawa, ON

- Built a cross-platform mobile app for matching people in schools and cities based on their needs and wants, using natural language with smart context; used Flutter and Supabase for frontend, database, authentication and media storage.
- Used Firebase Cloud Messaging (FCM) tokens, deployed TypeScript serverless functions, Stripe APIs, and other modern frameworks, to support deep linking, push notifications, two-step verification, and payment processing.
- Adopted standard SWE practices for iterative and collaborative builds using git, MVVM design pattern, and database security with sanitized API and webhook invocations.

PROJECTS (cont'd)

Screendial | Native Desktop Copilot| Rust, Typescript | [Website](#) 

September 2026

- Developed an agentic desktop voice assistant that overlays directly on your screen to guide you through complex desktop or web software workflows with supporting tools and skills for different scenarios.
- Used Tauri v2 and Rust to perform hardware-accelerated screen capture in <15ms, with Typescript for on-screen interface.
- Built a highlight tool that draws a bounding red box around specific UI elements on-screen such as buttons and menus, using normalized 2D coordinates, relative to the user's monitor resolution.
- Implemented a tool that renders interactive UI cards over the screen, such as checklist steps, copyable code snippets, or info cards, to provide extra guidance along model results.

Gemini Groceries & Recipe | AWS, MERN stack | [GitHub](#)

June 2025

Spurs Hack 2025 Hackathon

- Developed a full-stack grocery and recipe assistant using React.js, Node.js, Express.js, and MongoDB Atlas, enabling users to create smart shopping lists with AI for meal suggestions and nutrition tracking.
- Integrated Google's Gemini AI for image processing, to extract grocery items from shopping list photos and generate meal recommendations with nutritional facts and SerpAPI for product search and price matching between different grocery stores.
- Implemented secure user authentication with JWT tokens, RESTful API design, and responsive UI using Tailwind CSS with interactive 3D components using Three.js.

ASL Translation Software | Python, OpenCV, TensorFlow, Keras | [GitHub](#)

Nov 2024

cuHacking 2024 Hackathon

- Built and trained a Convolutional Neural Network (CNN) for Computer Vision with TensorFlow, Keras API, and OpenCV to translate American Sign Language (ASL) characters, achieving 90.5% accuracy during translation.
- Deployed model on a Python desktop app for demo during the cuHacking 2024 Hackathon, [presenting](#) how our software bridges communication gaps between deaf or non-verbal signers and non-signers.

Ride Along | Student Ridesharing App | [GitHub](#)

Mar 2025

cuHacking 2025 Hackathon

- Led development of a cross-platform ridesharing mobile & web app for university students using Flutter and Supabase, enabling carpooling with peers and cutting 45% commute costs spent on other platforms.
- Implemented in-app messaging and rendered live maps with driver and passenger location, using Flutter's native geolocator dependency, ensuring stability across device platforms.
- Designed Figma [pitch deck](#) and placed 2nd at cuHacking 2025 for community impact; deployed on AWS Amplify with CI/CD.

CERTIFICATIONS

Mobile App Development with Flutter | Udemy | [certification](#) 

Oct 2025

Machine Learning with Python | IBM | [certification](#) 

Aug 2024

Intro to Artificial Intelligence | IBM | [certification](#) 

June 2024

ACTIVITIES & OTHER EXPERIENCE

Mathematics Instructor

Sep 2024 – Present

Mathnasium Learning Centre

Ottawa, ON

- Delivered 1-on-1 math tutoring to grades K–12 students, assessing progress through quizzes and tests to improve academics.

Outreach Programmer, Co-op

Jan 2025 – Apr 2025

Faculty of Engineering and Design, Carleton University

Ottawa, ON

- Designed and led technical STEM workshops for youth using TinkerCAD and basic robotics software.
